# LYDIA™ VOICE – THE SMART ASSISTANT FOR VOICE-DIRECTED PROCESSES

Voice applications are an essential part of digitalisation in industry and intralogistics today. Especially when it comes to enhancing ergonomics, productivity and quality, there is no better alternative to voice.

The order data is transmitted from the warehouse management or ERP system to the voice client via Wi-Fi. LYDIA Voice converts the information into voice instructions and communicates them to the employees via a headset or the LYDIA VoiceWear. They in turn confirm each work step by voice input.

Voice technology enables the rapid delivery of process improvements and provides a quick return on investment.

DARE TO COMPARE!

Compare LYDIA Voice with your current picking solution and we guarantee it will provide you with a boost in the performance of your warehouse operations – regardless of whether you are working with another voice solution, scanner or paper-based solution.

99.9 % ACCURACY
LYDIA Voice guides and supports your employees in their picking tasks. Picking errors are reduced significantly.

MAXIMUM ERGONOMICS
Voice solutions are intuitive to use. Your employees always have their hands and eyes free to focus on the essential tasks.

+20 % PRODUCTIVITY
Voice interaction takes place in parallel with the actual work steps. This leads to faster and more efficient processes with an increase in productivity of up to 20 % or more.

SUPERIOR FLEXIBILITY
Voice solutions are quick to integrate, maximally flexible and scalable. As requirements change, the voice dialogue is simply adapted.

HAPPY STAFF
Due to the ergonomic and intuitive way of working, the acceptance of LYDIA Voice is always very high.

Over **20** **years**

VOICE EXPERTISE

For over **15** **years**

NO VOICE TEMPLATE TRAINING

For over **5** **years**

USE OF AI TECHNOLOGY

LEADING **SPEECH-RECOGNITION TECHNOLOGY**

LYDIA Voice is powered with artificial intelligence and delivers outstanding speech-recognition, even in challenging environments. Even users with a pronounced dialect or accent are recognised reliably and without prior voice-template training.

The latest generation of LYDIA Voice even understands multiple languages simultaneously. This is a considerable advantage, especially for non-native speakers and multinational teams. Onboarding-times are significantly reduced and your employees enjoy working with LYDIA Voice.

LYDIA™ VOICE – THE NEW #1 VOICE SOLUTION

LYDIA Voice is the most innovative and powerful voice solution that the voice market has to offer. In particular, companies that already use voice technology are impressed by the speech recognition performance, user-friendliness and flexibility of LYDIA Voice.

	Lydia VOICE	„OTHERS"
No voice template training	✔	
AI powered speech recognition	✔	
Parallel recognition of multiple languages	✔	
Headset-free picking with LYDIA VoiceWear	✔

OVER **350.000 LYDIA™ VOICE USERS** GLOBALLY

"LYDIA Voice increased employee performance by 11% in comparison with our previous system."

Marco Meusel
IT Software Services at SIMBA DICKIE GROUP

"We were able to put the system into operation in next to no time. Efficiency increased by 30%."

Randolf Halter
Head of Logistics at Uvex Group

"This is the best thing we ever implemented in the warehouse!."

Baron Jordan
Chief Production Manager at Coke One North America

"The hardware spoke for itself. It was much more innovative than what we saw from the competition."

Mette Margrethe Poulsen
Logistics Development Manager at NORMAL
