

Customized Battery Cell Casings for next generation Electric Vehicles

We are the leading manufacturer of Laser-welded tubes and pipes worldwide. With more than 50 years of experience we offer a wide range of diverse products and tubular components.

With our unique roll-forming technology we are able to manufacture battery cell casings with flexible geometries, lengths and very small corner radii. Additional features such as embossing, notches or punched holes for ventilation can be implemented in-line. Roll-forming offers high volume manufacturing at highest quality and lowest cost for aluminum or stainless steel. Wall thicknesses down to 0.3mm (0.012") are easily achievable.

Our benefits:

- Flexible choice of materials: stainless steel, aluminum, ...
- Wall thicknesses down to 0.3mm (0.012")
- Flexible geometries and "infinite" lengths
- Efficient cutting / separating process
- Very tight corner radii
- Sustainable manufacturing process with high cleanliness standards
