UNIQUE DESIGN,
EASE OF USE

HELLO,
NEW
LABOPORT!

LABOPORT®
N 96

LABOPORT® N 840 G

LABOPORT® N 820 G

■ Exceptionally space saving

The impressively compact device takes up little space.

■ Easy to clean

The smooth surfaces without any ribs or hard edges are easy to keep clean.

■ ATEX-compliant and chemically resistant for very aggressive/corrosive gases

The inner, wetted area has been equipped to transfer explosive atmospheres.

■ Expandable

Separators and/or condensers can be purchased individually at any time and easily fitted, enabling users to build their own customized vacuum system.

■ Integrated gas ballast valve

This valve supports short processing times even with solvents with a high boiling point, which protects the pump head.

■ Portable

The fold-out handle makes the device easy to transport and store.

■ Speed-controlled

The speed can be controlled by simply manually adjusting the vacuum power using the control knob or via an interface by connecting the pump to KNF's VC 900 controller. Ideal for combining with all common vacuum controllers with valve control.

■ 3-color status display

The changing color display allows the operational status to be ascertained at a glance.
