STAND-ALONE-EMAIL & STAND-ALONE-EMAIL+

Stand-alone email is a campaign-related form of advertising that is usually sent only once.

We offer you the choice of selecting only our own newsletter addresses or booking the entire address base of our media network.

The basis for the below mentioned **maximum reach of over 54,836 recipients** is our magazine target group.

With Email+, we can also cater to your individual needs, meaning you can further narrow down the target group, e.g. by company size or industry.

With this form of advertising, the owner of the address sends the stand-alone email on behalf of the booking company. The sender is therefore the owner of the address and not the advertising company. Since the advertising company is exclusively mentioned in the email, the level of attention is very high.

Your benefit in detail:

- Traffic for your landing page without large detours
- Low scattering losses due to very vertical addresses

- High level of attention in the target group
- Exclusive presentation of the company
- Image transfer by using our magazine title in the header of the email

Needless to say, all our addresses and those of our partners comply with the strict provisions of the German Data Protection Act (GDPR).

LEAD- & AWARENESS-PACKAGE

Win new customers plus increase awareness

With our publisher's lead packages, we offer our customers awareness and leads in one package. For example, the advert can be combined with a whitepaper download or the newsletter can be combined with an online advertorial and a defined number of leads. So you can do one thing with a lead package without leaving out the other.

We only deliver MQ leads, i.e. marketing-qualified leads that are not yet qualified to make a sales call. However, you have the prospect's permission to send them further information and thus convert the MQL into an SQL (sales-qualified lead) in just a few steps.

Leads are usually generated via electronic mailings in which interested parties are offered a whitepaper from our customer. By downloading the whitepaper the interested party releases their data and permission for further contact by our customer. All leads supplied by us therefore meet the high requirements of the GDPR.

We generate these lead addresses from our own address database or together with partners in our media network, depending on the quantity and required depth of information.

All our cooperation partners guarantee - as we do compliance with the legally prescribed data protection regulations according to the GDPR.

A lead address contains at least the following information:

Company name, address, company size, first name, surname, job function, e-mail, telephone number.

Should you require further information, we can provide this for an additional charge. We will be happy to provide you with a detailed offer.
